Plant, Cell and Environment (1994) **17**

Volume contents

PART 1

1 From the Editor: *Plant, Cell and Environment* breaks through!
H. Smith

3 Winding threads around plant cells: a geometrical model for microfibril deposition: opinion
A. M. C. Emons

15 A critical comparison of the pressure-probe and pressure-chamber techniques for estimating leaf-cell turgor pressure in *Kalanchoë daigremontiana*
R. Murphy & J. A. C. Smith

31 Molecular evolution of phospho*enol*pyruvate carboxylase
H. Toh, T. Kawamura & K. Izui

45 The effect of ultraviolet-B radiation and gene expression and pigment composition in etoilated and green pea leaf tissue: UV -B-induced changes are gene-specific and dependent upon the developmental stage
B.R. Jordan, P.E. James, Å. Strid & R. G. Anthony

55 Relationship between photoinhibition of photosynthesis, D1 protein turnover and chloroplast structure: effects of protein synthesis inhibitors
B. Schnettger, C. Critchley, U. J. Santore, M. Graf & G. H. Krause

65 The CO_2-concentrating mechanism is absent in the green alga *Coccomyxa:* a comparative study of photosynthetic CO_2 and light responses of *Coccomyxa, Chlamydomonas reinhardtii* and barley protoplasts
K. Palqvist, E. Ögren & U. Lernmark

73 Isotopic heterogeneity of water in transpiring leaves: identification of the component that controls the $\delta^{18}O$ of atmospheric O_2 and CO_2
D. Yakir, J. A. Berry, L. Giles & C. B. Osmond

81 The relationship between wound-induced proteinase inhibitors and hydraulic signals in tomato seedlings
M. Malone, L. Palumbo, F. Boari, M. Monteleone & H. G. Jones

89 Accumulation of glycine betaine during cold acclimation and freezing tolerance in leaves of winter and spring barley plants
S. Kishitani, K. Watanabe, S. Yasuda, K. Arakawa & T. Takabe

97 The origin and theoretical correction of thermal gradients in thermocouple psychometers: technical report
E. Vanderschmitt & F.-A. Daudet

105 A system for imaging transverse distribution of scattered light and chlorophyll fluorescence in intact rice: technical report
K. Takahashi, K. Mineuchi, T. Nakamura, M. Koizumi & H. Kano

111 A feedback control system for the precise and continuous regulation of photosynthetic flux density: technical report
N. J. Livingston

115 Symbiotic nitrogen-fixing root nodules of *Lathyrus maritimus* (L.) bigel (beach pea) from Newfoundland shore lines with special reference to oleosomes (lipid bodies)
J. Barimah-Asare & A. K. Bal

121 Book Reviews

PART 2

123 Requirement for carbonic anhydrase activity in processes other than photosynthetic inorganic carbon assimilation: opinion
J. A. Raven & J. R. Newman

131 Amino acid metabolism associated with N-mobilization from the flag leaf of wheat (*Triticum aestivum* L.) during grain development
K. M. U. Peeters & A. J. Van Laere

143 Photon requirement for O_2-evolution in red ($\lambda = 680$ nm) light for some C_3 and C_4 plants and a C_3–C_4 intermediate species
B. A. Osborne

153 Compartmentation and transport of zinc in barley primary leaves as basic mechanisms involved in zinc tolerance
A. Brune, W. Urbach & K.-J. Dietz

163 Behaviour of plasma membrane, cortical ER and plasmodesmata during plasmolysis of onion epidermal cells
K. J. Oparka, D. A. M. Prior & J. W. Crawford

173 Carbon isotope discrimination and water-use efficiency of six crops grown under wet and dryland conditions
J. D. Knight, N. J. Livingston & C. Van Kessel

181 Expansion rate of young tomato fruit growing on plants at positive water potential
R. I. Grange & J. Andrews

189 Elevated atmospheric CO_2 alters stomatal responses to variable sunlight in a C_4 grass
A. K. Knapp, J. T. Fahnestock & C. E. Owensby

197 Respiration rates predict differences in growth of coast redwood
T. S. Anekonda, R. S. Criddle, W. J. Libby, R. W. Breidenbach & L. D. Hansen

205 Temperature-sensitivity of D1 protein metabolism in isolated *Zea mays* chloroplasts
G. J. Bredenkamp & N. R. Baker

211 An open-air system for exposing forest-canopy branches to ozone pollution: technical report
M. G. Tjoelker, J. C. Volin, J. Oleksyn & P. B. Reich

219 A low-cost psychrometer for field measurements of atmospheric humidity: technical report
S. J. Allen, A. J. Brenner & J. Grace

227 Effect of Ca^{2+} on the retention of glycerol and amino acids in *Dunaliella tertiolecta*: short communication
S. Fujii

231 Book Reviews

PART 3

233 Plant distribution and the temperature coefficient of metabolism
R. S. Criddle, M. S. Hopkin, E. D. McArthur & L. D. Hansen

245 Differential stimulation of an arid-environment winter ephemeral *Dimorphia pluvialis*
C. F. Musil & S. J. E. Wand

257 The cellular pathway of photosynthate transfer in the developing wheat grain. I. Delineation of a potential transfer pathway using fluorescent dyes
H. L. Wang, C. E. Offler, J. W. Patrick & T. D. Ugalde

267 Spectral balance and UV-B sensitivity of soybean: a field experiment
M. M. Caldwell, S. D. Flint & P. S. Searles

277 Control of steady-state photosynthesis in sunflowers growing in enhanced CO_2
I. E. Woodrow

287 Induction of PPi-dependent phosphofructokinase by phosphate starvation in seedlings of *Brassica nigra*
M. E. Theodorou & W. C. Plaxton

295 The importance of the ratio UV-B/photosynthetic active radiation (PAR) during leaf development as determining factor of plant sensitivity to increased UV-B irradiance: effects on growth, gas exchange and pigmentation of bean plants (*Phaseolis vulgaris* cv. Label)
G. Deckmyn, C. Martens & I. Impens

303 Hardening of root cell walls: a growth inhibitory response to salinity stress
P. M. Neumann, H. Azaizeh & D. Leon

311 The effects of UV-B radiation on loblolly pine. 3. Interaction with CO_2 enhancement
J. H. Sullivan & A. H. Teramura

319 Day-to-day variation in nitrogenase activity of *Alnus incana* explained by weather variables: a multivariate time series analysis
A. Ekblad, P.-O. Lundquist, M. Sjöström & K. Huss-Danell

327 Growth cycle stage-dependent NaCl induction of plasma membrane H^+-ATPase mRNA accumulation in de-adapted tobacco cells
E. Perez-Prat, M. L. Narasimhan, X. Niu, M. A. Botella, R. A. Bressan, V. Valpuesta, P. M. Hasegawa & M. L. Binzel

333 Stomatal responses to sodium ions in *Aster tripolium*: a new hypothesis to explain salinity regulation in above-ground tissues
L. K. R. R. Perera, T. A. Mansfield & A. J. C. Malloch

339 Starch metabolism in germinating soybean cotyledons is sensitive to clinorotation and centrifugation: short communication
C. S. Brown & W. C. Piastcuch

343 Book Reviews

PART 4

345 Speculations on carbon dioxide starvation, Late Tertiary evolution of stomatal regulation and floristic modernization: opinion
J. M. Robinson

355 Influence of stem lacunar structure on gas transport: relation to the oxygen transport potential of submersed vascular plants
J. L. Schuette, M. J. Klug & K. L. Klomparens

367 A modelling analysis of the effects of climatic warming on the probability of spring frost damage to tree species in The Netherlands and Germany
K. Kramer

379 Water uptake regulation in peach trees with split-root systems
T. Simonneau & R. Habib

389 Reversing cavitation in tracheids of *Pinus sylvestris* L. under negative water potentials
W. R. N. Edwards, P. G. Jarvis, J. Grace & J. B. Moncrieff

399 Carbon and nitrogen content of congeneric annual and perennial grass species: relationships with growth
E. Garnier & S. Vancaeyzeele

409 Overexpression of oat phytochrome A gene differentially affects stem growth responses to red/far-red ratio signals characteristic of sparse or dense canopies
J. J. Casal & R. A. Sánchez

419 Growth, sucrose synthase, and invertase activities of developing *Phaseolus vulgaris* L. fruits
S. S. Sung, W. J. Sheih, D. R. Geiger & C. C. Black

427 A new equation for calculating osmotic potential
T. T. Cochrane

435 The influence of elevated CO_2 on non-structural carbohydrate distribution and fructan accumulation in wheat canopies
D. R. Smart, N. J. Chatterton & B. Bugbee

443 Root elongation rate is accounted for by intercepted PPFD and source-sink relations in field and laboratory-grown sunflower
L. A. N. Aguirrezabal, E. Deleens & F. Tardieu

451 Temperature dependence of trans plasma membrane electron transport in *Zea mays* L. roots
O. Döring & M. Böttger

457 Redox characteristics of normal and habituated cell lines of sugarbeet
B. Carrié, Th. Gaspar, H. Greppin & C. Penel

463 Book Reviews

PART 5

465 Does Rubisco control the rate of photosynthesis and plant growth? An exercise in molecular ecophysiology: commissioned review
M. Stitt & D. Schulze

489 The use of mutants and transgenic plants to study nitrate assimilation: commissioned review
T. Hoff, H.-N. Truong & M. Caboche

507 Protection against oxygen radicals: an important defence mechanism studied in transgenic plants: commissioned review
C. H. Foyer, P. Descourvières & K. J. Kunert

525 Genetic approaches to auxin action: commissioned review
L. Hobbie & M. Estelle

541 The use of mutants and transgenic plants to study amino acid metabolism: commissioned review
P. J. Lea & B. G. Forde

557 The use of transgenic and naturally occurring mutants to understand and manipulate tomato fruit ripening: commissioned review
J. E. Gray, S. Picton, J. J. Giovannoni & D. Grierson

573 Virus movement proteins and other molecular probes of plasmodesmal function: commissioned review
S. Wolf & W. J. Lucas

587 Metabolic control analysis of plant metabolism: commissioned review
T. ap Rees & S. A. Hill

601 Approaches to influence starch quantity and starch quality in transgenic plants: commissioned review
B. Müller-Röber & J. Koßmann

615 Action and function of phytochrome family members revealed through the study of mutant and transgenic plants: commissioned review
G. C. Whitelam & N. P. Harberd

627 Use of transgenic plants and mutants to study the regulation and function of lipid composition: commissioned review
S. Gibson, D. L. Falcone, J. Browse & C. Somerville

639 Mutational analysis of blue-light sensing in *Arabidopsis:* commissioned review
E. Liscum & R. P. Hangarter

649 Manipulation of sink-source relations in transgenic plants: commissioned review
U. Sonnewald, J. Lerchl, R. Zrenner & W. Frommer

659 Approaches to improve stress tolerance using molecular genetics: commissioned review
D. Bartels & D. Nelson

669 Studying plant development in mosses: the transgenic route: commissioned review
C. D. Knight

675 Insights into root development from *Arabidopsis* root mutants: commissioned review
P. N. Benfey & J. W. Schiefelbein

PART 6

681 Suitability of *Arabidopsis* for studies on intracellular pH regulation: correlation between H^+ pump activity, cytosolic pH and malate level in wild-type and in a mutant partially insensitive to fusicoccin
N. Beffagna & G. Romani

691 Phenotypic plasticity of stem elongation in two ecotypes of *Stellaria longipes*: the role of ethylene and response to wind
R. J. N. Emery, D. M. Reid & C. C. Chinnappa

701 Non-uniform stomatal closure and the apparent convexity of the photosynthetic photon flux density response curve
T. Olsson & J. W. Leverenz

711 How much sodium accumulation is necessary for salt tolerance in subspecies of the halophyte *Atriplex canescens*?
E. P. Glenn, M. Olsen, R. Frye, D. Moore & S. Miyamoto

721 Low-temperature pretreatment of the root system of *Brassica rapa* L. plants: effects on the xylem sap exudation and on the nitrate absorption rate
J. Bigot & J. Boucaud

731 Sites of action of sulphite and bisulphite in the photosynthetic apparatus of sugar maple leaves as studied by photo-acoustic and modulated fluorescence methods
C. N. N'Soukpoé-Kossi, K. Veeranjaneyulu & R. M. Leblanc

739 Inhibition of photosynthesis by osmotic stress in pea (*Pisum sativum*) mesophyll protoplasts is intensified by chilling or photoinhibitory light; intriguing responses of respiration
K. Saradadevi & A. S. Raghavendra

747 The sensitivity of C_3 photosynthesis to increasing CO_2 concentration: a theoretical analysis of its dependence on temperature and background CO_2 concentration
M. U. F. Kirschbaum

755 Circadian rhythms and the induction of flowering in the long-day grass *Lolium temulentum* L.
C. Périlleux, G. Bernier & J.-M. Kinet

763 Photosynthetic characteristics of the shade-adapted C_4 grass *Muhlenbergia sobolifera* (Muhl.) Trin.: control of development of photorespiration by growth temperature
M. Smith & Y. Wu

771 Chloroplast ultrastructure changes in *Pisum sativum* associated with supplementary ultraviolet (UV-B) radiation: short communication
J. He, L.-K. Huang & M. I. Whitecross

777 Blue-green fluorescence excited by UV laser on leaves of different species originates from cutin and is sensitive to leaf temperature: short communication
G. Bongi, A. Palliotti, P. Rocchi, I. Moya & Y. Goulas

781 Erratum

PART 7

783 Plant defence systems induced by ozone: commissioned review
J. Kangasjärvi, J. Talvinen, M. Utriainen & R. Karjalainen

795 Growth and reproduction of *Arabidopsis thaliana* in relation to storage of starch and nitrate in the wild-type and in starch-deficient and nitrate-uptake-deficient mutants
W. Schulze, E.-D. Schulze, J. Stadler, H. Heilmeier, M. Stitt & H.A. Mooney

811 Developmental changes in the diurnal water budget of the grape berry exposed to water deficits
M.D. Greenspan, K.A. Shackel & M.A. Matthews

821 Within-season variability in mycorrhizal benefit to reproduction in *Abutilon theophrasti* Medic.
D.L. Shumway & R.T. Koide

829 Far-red light reflected from neighbouring vegetation promotes shoot elongation and accelerates flowering in spring barley plants
M.H. Davis & S.R. Simmons

837 An osmotic hypothesis for the regulation of oxygen permeability in soybean nodules
L.C. Purcell & T.R. Sinclair

845 Abscisic acid in apoplastic sap can account for the restriction in leaf conductance of white lupins during moderate soil drying and after rewatering
M.J. Correia & J.S. Pereira

853 The effect of growth at elevated CO_2 concentrations on photosynthesis in wheat
I.F. McKee & F.I. Woodward

861 Influence of high carbohydrate content on the activity of plastidic and cytosolic isoenzyme pairs in photosynthetic tissues
A. Krapp & M. Stitt

867 A gauge to measure the mass flow rate of water in trees: technical report
S. Chandra, P.A. Lindsey & N.L. Bassuk

875 Book reviews

PART 8

881 Scaling sun and shade photosynthetic acclimation of *Alocasia macrorrhiza* to whole-plant performance – I. Carbon balance and allocation at different daily photon flux densities
D.A. Sims & R.W. Pearcy

889 Scaling sun and shade photosynthetic acclimation of *Alocasia macrorrhiza* to whole-plant performance – II. Simulation of carbon balance and growth at different photon flux densities
D.A. Sims, R.L.E. Gebauer & R.W. Pearcy

901 Gamma-ray-induced changes in the synthesis of tomato pericarp protein
J.-M. Ferullo, L. Nespoulous & C. Triantaphylidès

913 Regulation of the expression of photosynthetic nuclear genes by CO_2 is mimicked by regulation by carbohydrates: a mechanism for the acclimation of photosynthesis to high CO_2?
J.-J. Van Oosten, D. Wilkins & R.T. Besford

925 Anaerobiosis-mediated early transcriptional and translational responses in rice (*Oryza sativa* L.) coleoptiles and roots
D. Breviario, S. Gianí, L. Morello & I. Coraggio

935 Gas exchange and growth responses to elevated CO_2 and light levels in the CAM species *Opuntia ficus-indica*
M. Cui & P.S. Nobel

945 Decreased ribulose-1,5-bisphosphate carboxylase/oxygenase in transgenic tobacco transformed with 'antisense' *rbc*S. VIII. Impact on photosynthesis and growth in tobacco growing under extreme high irradiance and high temperature
A. Krapp, M.M. Chaves, M.M. David, M.L. Rodriques, J.S. Pereira & M. Stitt

955 The interactive effects of light and inorganic carbon on aquatic plant growth
T.V. Madsen & K. Sand-Jensen

963 The chemical composition and anatomical structure of leaves of grass species differing in relative growth rate
J.J.C.M. van Arendonk & H. Poorter

971 Changes in net photosynthesis and growth of *Pinus eldarica* seedlings in response to atmospheric CO_2 enrichment
R.L. Garcia, S.B. Idso, G.W. Wall & B.A. Kimball

979 The pH-dependent yield threshold of the cell wall in a glycerinated hollow cylinder (*in vitro* system) of cowpea hypocotyl
H. Okamoto & A. Okamoto

985 Erratum

PART 9

987 From the Editor: ISI Journal Citations and Impact Factors for 1992
H. Smith

989 Integrated tolerance mechanisms: constitutive and adaptive plant responses to elevated metal concentrations in the environment: opinion
A.A. Meharg

995 Dynamics of patchy stomatal movements, and their contribution to steady-state and oscillating stomatal conductance calculated using gas-exchange techniques
Z.G. Cardon, K.A. Mott & J.A. Berry

1009 Pine needle growth and fine structure after prolonged acid rain treatment in the subarctic
J. Bäck, S. Neuvonen & S. Huttunen

1023 Consequences of growth at two carbon dioxide concentrations and two temperatures for leaf gas exchange in *Pascopyrum smithii* (C_3) and *Bouteloua gracilis* (C_4)
J.A. Morgan, H.W. Hunt, C.A. Monz & D.R. Lecain

1035 Freezing tolerance and avoidance in high-elevation Hawaiian plants
C.C. Lipp, G. Goldstein, F.C. Meinzer & W. Niemczura

1045 Isoforms of glutamine synthetase in asparagus spears: the cytosolic enzyme increases after harvest
C.G. Downs, W.M. Borst, P.L. Hurst & D.G. Stevenson

1053 A theoretical explanation of the Piper–Steenbjerg effect
F. Wikström

1061 Effective stomatal and boundary-layer resistances of heterogeneous surfaces
K.G. McNaughton

1069 Influence of temperature on the rhythmic emission of volatiles from *Ribes nigrum* flowers *in situ*
L. Hansted, H.B. Jakobsen & C.E. Olsen

1073 Nitrogen partitioning and assimilation: methods for the extraction, separation and mass spectrometric analysis of nitrate, amino acid and soluble protein pools from individual plants following ^{15}N labelling: technical report
W.E. Robe, H. Griffiths, D. Sleep & C. Quarmby

PART 10

1081 Modelling forest response to increasing CO_2 concentration under nutrient-limited conditions: theoretical paper
M.U.F. Kirschbaum, D.A. King, H.N. Comins, R.E. McMurtrie, B.E. Medlyn, S. Pongracic, D. Murty, H. Keith, R.J. Raison, P.K. Khanna & D.W. Sheriff

1101 Adaptation of the tonoplast V-type H^+-ATPase of *Mesembryanthemum crystallinum* to salt stress, C_3–CAM transition and plant age
R. Ratajczak, J. Richter & U. Lüttge

1113 Investigations of mechanisms of resistance to bipyridyl herbicides in *Arctotheca calendula* (L.) Levyns
C. Preston, S. Balachandran & S.B. Powles

1125 The influence of nitrogen availability on carbon and nitrogen storage in the biennial *Cirsium vulgare* (Savi) Ten. I. Storage capacity in relation to resource acquisition, allocation and recycling
H. Heilmeier, M. Freund, T. Steinlein, E.-D. Schulze & R.K. Monson

1133 The influence of nitrogen availability on carbon and nitrogen storage in the biennial *Cirsium vulgare* (Savi) Ten. II. The cost of nitrogen storage
R.K. Monson, E.-D. Schulze, M. Freund & H. Heilmeier

1143 Comparison of electric and growth responses to excision in cucumber and pea seedlings. I. Short-distance effects are a result of wounding
R. Stahlberg & D.J. Cosgrove

1153 Iron deficiency-induced changes in the photosynthetic pigment composition of field-grown pear (*Pyrus communis* L.) leaves
F. Morales, A. Abadía, R. Belkhodja & J. Abadía

1161 Insects and fungi on a C_3 sedge and a C_4 grass exposed to elevated atmospheric CO_2 concentrations in open-top chambers in the field
G.B. Thompson & B.G. Drake

PART 11

1169 Xylem water transport: is the available evidence consistent with the cohesion theory?: opinion
U. Zimmermann, F.C. Meinzer, R. Benkert, J.J. Zhu, H. Schneider, G. Goldstein, E. Kuchenbrod & A. Haase

1183 The plasmalemma surface area exposed to the soil solution is markedly reduced by maturation of the exodermis and death of the epidermis in onion roots
S.A. Kamula, C.A. Peterson & C.I. Mayfield

1195 Predicting responses of photosynthesis and root fraction to elevated $[CO_2]_a$: interactions among carbon, nitrogen, and growth: theoretical paper
Y. Luo, C.B. Field & H.A. Mooney

1205 Interacting effects of CO_2 concentration, temperature and nitrogen supply on the photosynthesis and composition of winter wheat leaves
E. Delgado, R.A.C. Mitchell, M.A.J. Parry, S.P. Driscoll, V.J. Mitchell & D.W. Lawlor

1215 Replacement of nitrate by ammonium as the nitrogen source increases the salt sensitivity of pea plants. I. Ion concentrations in roots and leaves
M. Speer, A. Brune & W.M. Kaiser

1223 Replacement of nitrate by ammonium as the nitrogen source increases the salt sensitivity of pea plants. II. Inter- and intracellular solute compartmentation in leaflets
M. Speer & W.M. Kaiser

1233 Intra- and inter-plant variation in xylem cavitation in *Betula occidentalis*
J.S. Sperry & N.Z. Saliendra

1243 Long-term responses of *Melilotus segetalis* to salinity. I. Growth and partitioning
J.M. Romero & T. Marañón

1249 Long-term responses of *Melilotus segetalis* to salinity. II. Nutrient absorption and utilization
J.M. Romero, T. Marañón & J.M. Murillo

PART 12

1257 Does proline play a special role in bacteroid metabolism?: opinion
D.H. Kohl, P.F. Straub & G. Shearer

1263 Root xylem transport of amino acids in the root hemiparasitic shrub *Olax phyllanthi* (Labill) R.Br. (Olacaceaea) and its multiple hosts
J.S. Pate, G. Woodall, W.D. Jeschke & G.R. Stewart

1275 The effects of CO_2, temperature and their interaction on the growth and yield of carrot *(Daucus carota L.)*
T.R. Wheeler, J.I.L. Morison, R.H. Ellis & P. Hadley

1285 Effects of low temperature on lateral diffusion in plasma membranes on maize (*Zea mays* L.) root cortex protoplasts: relevance to chilling sensitivity
K.L. Koster, M.A. Tengbe, V. Furtula & E.A. Nothnagel

1295 Loss of intracellular glycerol from *Dunaliella* by electroporation at constant osmotic pressure: subsequent restoration of glycerol content and associated volume changes
M. Shariati & R. McC. Lilley

1305 Regulation of transpiration in coffee hedgerows: covariation of environmental variables and apparent responses of stomata to wind and humidity
M.V. Gutiérrez, F.C. Meinzer & D.A. Grantz

1315 Leaf extension in the *slender* barley mutant: delineation of the zone of cell expansion and changes in translatable mRNA during leaf development
P.H.D. Schünmann, H.J. Ougham & K.S. Turk

1323 Blue-light-induced pH changes associated with NO_3^-, NO_2^- and Cl^- uptake by the green alga *Monoraphidium braunii*
P.J. Aparicio, F.G. Witt, J.M. Ramírez, M.A. Quiñones & T. Balandín

1331 Seasonal variation of leaf glutamine synthetase isoforms in temperate deciduous trees strongly suggests different functions for the enzymes
J. Pearson & Y.-M. Ji

1339 Negative phototropism in young gametophytes of the fern *Schizaea pusilla*
J.Z. Kiss

1345 Book review

1347 Instructions to contributors
